NovaDent – Remake Policy

At NovaDent Labs, we are committed to providing high-quality products and services. In the event that a remake is required, the following policy outlines the conditions under which remakes are accepted, prioritised, and charged.

1. Remake Eligibility and Charges

Free of Charge Remakes:

Remakes are provided free of charge only when NovaDent Labs is at fault. These cases will be prioritised.

Client-Liable Remakes:

Remakes will be charged in full under the following conditions:

- If design, margin, die, bite, or impression issues are identified and the client instructs NovaDent Labs to proceed despite the advice given.
- If the remake is due to incorrect or incomplete information (e.g. wrong tooth number, shade change, incorrect bite).
- If the prosthetic fits the original model, but a new impression or scan is sent.
- If instructions, material, design, prep, or occlusion are changed after the case is approved.
- If you approve the design you will be liable for any changes or additions.
- If "No Model" was requested by the client — fit cannot be assessed, and liability is void.
- If a remake is cancelled by the client after commencement — the full original charge will still apply.
- Chrome Cobalt Framework and Acrylic processing needs to have a set up stage in order to qualify for remake, direct finish on Cobalt Chrome Framework is not advised.

Delivery Fees:

Delivery fees may apply to remakes where the client is liable.

NovaDent Labs

NovaDent – Remake Policy

Proof Required:

Clients must submit clear photo or video evidence of the issue. NovaDent may require all original items to be returned, including the model and prosthetic, for proper evaluation. Failure to provide sufficient evidence or return the required items may result in the remake being ineligible for free of charge.

Design Approval:

Once a design is approved, the client is liable for any changes made afterward.

2. Remake Request Process

All remake requests must follow this process:

Submit in Writing:

All requests must be emailed to:
lab@novadent.com.au

Include in Request:

- Reason for remake
- Supporting documentation (photos/videos)
- Any relevant case information

Approval Required:

- All remake requests must be reviewed and approved by the NovaDent Team before commencement.
- Customer Care representatives cannot advise on ETA or status until the remake is approved and in production.

Assessment & Outcome:

- Upon receiving and assessing the case, a determination will be communicated via email.
- If the process above is not followed, the remake will be charged in full.
